ABSTRACT OF THE DISCLOSURE

METHODS OF COATING A SUBSTRATE AND OF FORMING A COLOURED FILM, AND AN ASSOCIATED DEVICE

The A method comprises comprising the following steps:
————placing the substrate (12) in an evacuated enclosure (14);_———
forming a gas by evaporating a component that is liquid at
atmospheric pressure and at ambient temperature; and
————introducing the gas into the enclosure (14). The gas is
decomposed and a complementary gas is introduced into the enclosure (14) for the
purpose of reacting with the decomposed gas so as to form at least one thin layer on
the substrate-(12). The invention also relates to Also disclosed is a method of forming
a eoloured colored film and to an associated device (10) capable of implementing the
method of the invention.
